- Projects
- Medical Attention Required
- Multiple Users
- Take Pictures of Attendees, Incidents & Accidents

VISIT **SAFETYMEETINGAPP.COM** OR CONTACT THE CASCADE CHAPTER AT 425.258.2644 FOR MORE INFORMATION.

SUGGEST NEW FEATURES!

We are constantly working to make your Safety Meeting App experience the best it can be and always love to hear your feedback. We've rolled out some great new features and functions to make your safety compliance reporting easier than ever.

New Data Fields

With the newest data fields to our incident reporting feature, you can now enter:

- Incident Type
- Reporter
- Employment Status
- Project
- Medical Attention Required

These fields are optional, but are a great way to make sure you include all pertinent information in your incident reports.

CSV Export

Another feature that we've added to our incidents reporting section is the ability to export incident data in a CSV format. Under the reports section of the app portal you can create a CSV file for a desired date range. This data can be easily integrated into an existing Excel file.

COVID-19 Topics

Since the start of the COVID-19 pandemic we've added multiple new COVID-19 based meetings. These include use and care of your mask, social distancing recommendations, daily wellness checks and more!

Leader Signature

You can now add a leader's signature directly from the app when creating a meeting! This signature will then appear in the meeting report.

Reorganize Your Data

Did you know you can organize your meetings by any of the information fields? Simply double click a field header to reorganize your data by that field.
